.....

Read the poem and answer the question below.

(1 x 5 = 5 marks)

The Crow

Old crow , upon the tall tree- top

I see you sitting at your ease,

You hang upon the highest bough

And the balance in the breeze.

How many miles you've been to-day

Upon your wings so strong and black,

And steered across the dark grey sky

Without a guide or track ;

Above the city wrapped in smoke,

Green fields and rivers flowing clear;

Now tell me, as you passed them o'er,

What did you see and hear?

The crow shakes his sooty wing

And answers hoarsely , “ caw, caw,caw”

And that is all the crow can tell

Of what he heard and saw.

(By: Mrs. Alexander)

1. Where was the crow sitting ?

.....

2. Write adjectives for the following words.

i)..... crow

ii).....sky

iii)..... field

iv)..... wing

3. Where did the crow steer ?

.....

- Include;
- the purpose of the training programme
 - number of the members in your club
 - ask a convenient date, time and venue for the programme

Test 15

Read the passage and answer the questions .

(8 marks)

As the sun sets and the sky slowly darkens, many animals stir and come awake. These are the animals of night or nocturnal animals . For **them** the hours of twilight and darkness are the best feeding times.

Listen at night and you will hear them. An owl hoots; frogs and toads chorus in marshes and swamps; a cricket chirps . Dry grass rustles as a mouse scurries through a field . And also, the night is alive with animals – with moths, salamanders, cats, raccoons and porcupines etc.

There is one animal of night that you will not hear , though. This is the bat, which seldom makes a sound that human ears can hear. When the insect eating birds have gone to rest , the bats patrol the skies on wings of night.

Most bats are insect eaters. In a few hours' hunting, one bat may catch and eat several hundred insects. There are places where it is easy to see bats setting out to hunt . You can see them setting out from caves, church towers, and tunnels etc. Their flight is swift and silent and the night tends to hide them and the night attracts insects and the insects attract bats.

A little brown bat is a fine chance to watch a remarkable animal in action. **It** flies and hunts with great skill. It speeds across a room or porch , yet touches nothing . It uses **echolocation** to fly through the rungs of a chair without hitting them and to skim by lamp.

The bat belongs to the class of mammals. Among the mammals only bat can fly, because only bats have wings and the power of flight.

1. Write two places that bats are setting out to hunt.

i)..... ii. (1 mark)

2. Underline the correct answer.

Most bats like(fruits/ insects / grass) (1 mark)

3. Complete the blank using a word from the passage.

The bat flies and hunts with great (1 mark)

4. What is the system that bats use to fly through obstacles at nights?

..... (1 mark)

5. Say whether the following sentences are True or False by writing “T “ or “ F “ against each one of them.

(i) All the animals sleep at night. (.....)

(ii) Crickets and owls are nocturnal animals. (.....)

(iii) Bats rarely make sounds. (.....)

(iv) Bat is the only mammal that can fly. (.....). (2 marks)

6. Find the adjectives from the passage for the following words.

a)grass b.eaters (1 mark)

7. What do the following words in the passage refer to?

a) “ **them**” in paragraph 1

b) “ **it**” in paragraph 5 (1 mark)

Write on one of the following. Use about 200 words. (15 marks)
